## Core Team

- DOE/WAP
  - Jennifer Somers and Josh Olsen
- ORNL (9 people)
  - Mark Ternes (Principal Investigator)
  - Mini Malhotra, Michael MacDonald (SRA), Piljae Im, Gina Accawi
  - Software development: 2 ORNL staff and 2 subcontractors
- LBNL (10 people)
  - Evan Mills (Principal Investigator)
  - Norm Bourassa (Technical Lead)
  - Leo Rainer, Chris Havstad, Gregory Homan, Danny Parker (FSEC), Sub-contractors (coding, testing, & usability)

## Multifamily Audit Tools Project Goals

Assess market needs for next-generation multifamily energy analysis within the WAP and beyond and create the next generation of software tools to serve that need.

- Enhance energy modeling capabilities
- Provide flexible multi-zone, multi-system modeling environment
- Improve retrofit measure identification
- Enhance auditor capabilities
- Allow improved workforce skills & mobility
- Build confidence among consumers, building owners, financing community

## Existing Multifamily Tools: WAP

- EA-QUIP, TREAT, NEAT, others have approvals
- Requests for approval of eQUEST
- Special tools or analyses to “verify” results
- Tools vary in their strengths and weaknesses (climates, system types, building types and complexity, ability to evaluate measures)
- Some disk-based, others usable via the web
- Some tools free, others require license

U.S. DEPARTMENT OF  
**ENERGY**

## Assessing User Needs; Incorporating User Input

- Building stock review
- Two focus groups - Fall 2010
  - 15 – 20 participants in each session from all over country
- Discussion sessions at ACI and presentation in Chicago
  - ~40 attendees at ACI
  - ~50 attendees at Chicago presentation in August
- Social Media (Home Energy Pros) - ongoing
  - 77 members in discussion, 4 topical threads, 40 posts

**>> Affirmation of desire for improved energy analysis tools**

Energy Efficiency &  
Renewable Energy

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Important That Tools Address Low Rise and Hot Climates

RECS 2005 MF 5+ Regional Breakout

Heating System Regional Breakout

- RECS 2005, about 17 million households
- 70–80% of all MF 5+ dwellings are in “small” buildings in all four regions
- Complex systems less important in S and W

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Some Primary Needs Identified

- Technical
  - Multiple zones and heating & cooling systems
  - Improved methods of handling thermal distribution systems
  - Improved methods of handling impact of sensor location, controls, operation
  - Better handling of ventilation systems and measures
  - System degradation and tune-up/maintenance measures
  - Rules-based savings estimation
  - Water-mains temperature effect on DHW energy use
  - Utility bill disaggregation, with improved weather data
- Market
  - A large proportion of the target building stock is low-rise and in hot climates
  - Web-based delivery preferred over disk-based
  - Web services (APIs) desired by third-party tool developers
  - Users seek tools to perform analysis within as well as outside the WAP framework

## Weatherization Assistant — today

- NEAT and MHEA only — not multifamily-specific
- Locally run on PCs at agency level
- Aggregation to state level by agency

U.S. DEPARTMENT OF  
**ENERGY**

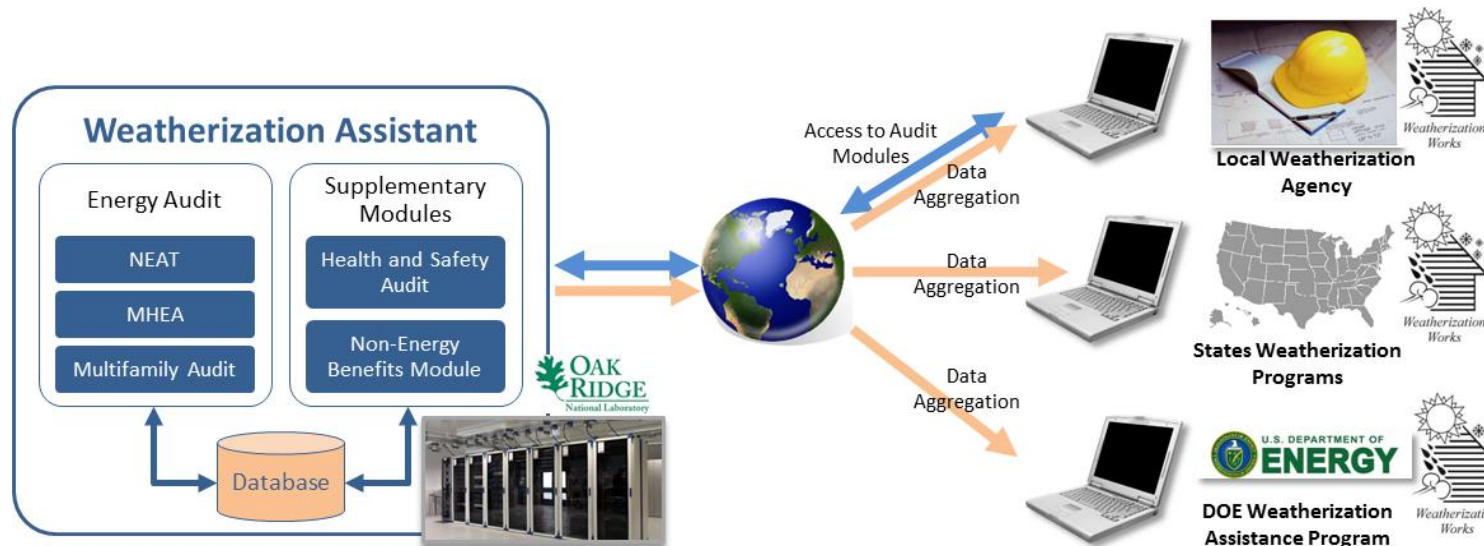

Energy Efficiency &  
Renewable Energy

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Weatherization Assistant — planned

- NEAT, MHEA, H&S, NEBs, new multifamily tool
- All run as Internet web service, secure servers
- Central data base

Energy Efficiency &  
Renewable Energy

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Retrofit Measures, Version 1

Measure	Coverage
Air sealing	Basic only, all combined in air change or other model
Insulation / R-value	Add or augment in any envelope component
Windows	Replace, add storms, add interior shading
Doors	Replace, add storm door
Heating system	Replace, IID, tuneup—specify efficiency improvement, remove units
Cooling system	Replace, tuneup—specify efficiency improvement, remove units
Domestic hot water	Replace heaters, reduce flows, controls / scheduling

**Version 2 will add more complicated measures and coverage**

## Multifamily Energy Models and Calculation Engine

- Weatherization Assistant and Home Energy Saver (HES) GUIs
  - Use same multifamily energy models on the Home Energy Saver backend (API)
- New HES backend models: DOE-2.1e primary, Domestic Hot Water and Appliance
- Full DOE-2 and HES outputs will be available.
  - Multiple end-uses will be “metered” as part of the simulation results
- The Home Energy Saver MF (API) calculation engine will be available to marketplace, license fee for some

## Home Energy Saver in a Nutshell

- Developed at LBNL. Sponsors: DOE, EPA, HUD/PATH, CEC, California Air Resources Board, Touchstone Energy Cooperatives, Infosys
- Web-based hourly simulation: DOE-2 (single-zone) and other models (LBNL, EPRI, NREL).
- Rapidly computes a home's energy consumption (all end uses), cost, and carbon footprint for any USA location and Benchmarks to regionally typical homes.
- Hundreds of possible “asset” and “operational” inputs, with smart defaults available for each home description question.
- Generates a list of payback-ranked energy-saving recommendations.
- Provides extensive decision-support information to help users implement the recommendations. Linked to social media environments.
- Transparently documented – no “black boxes”
- ~ 1 million web visits each year
- Third-party developers creating derivative tools via web service APIs for desktop & mobile applications

## Multifamily Tools Development Staging

- Based on the assessment of needs, input from experts across the country, and Weatherization program requirements, the WAP multifamily energy audit tool is planned to be developed in two stages:
  - **Version 1 (testing signup January 2012)**, will handle buildings with simpler system configurations, mostly low-rise buildings
  - **Version 2 (testing signup Fall 2012)** will be developed in a second stage and will increase the energy calculation capabilities to handle taller building configurations, more complex building systems, and more complex measures
- The Home Energy Saver will be upgraded in parallel

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

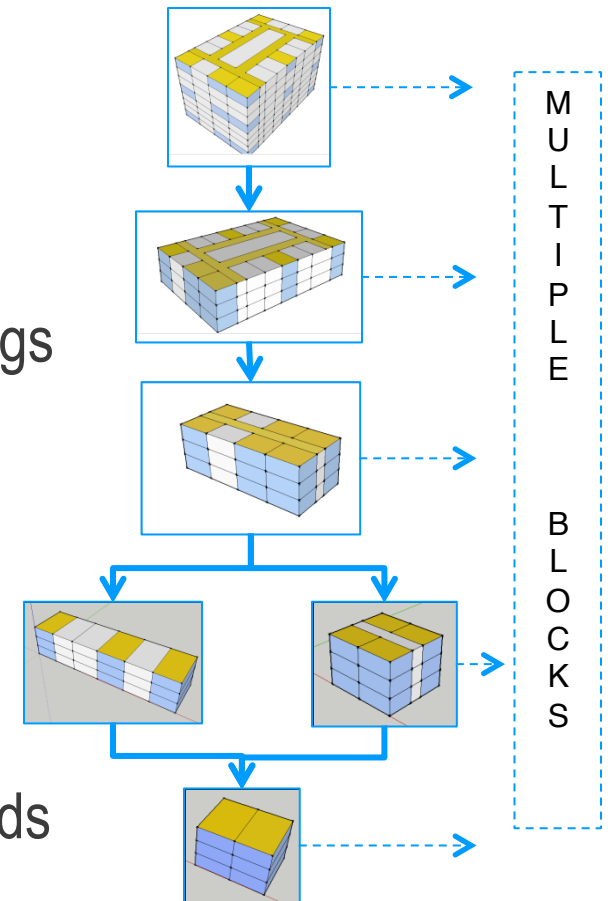

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## New Modeling Approaches

- Multiple Thermal Zones, adaptive coding approach to generalize most/all geometries
- Simplified Building Typologies, balance simplification of input with complexity of buildings
- Multiple Systems
- Utility Bill Reconciliation as first step, auditor driven, simplified in Version 1
- DOE-2.1e calculation engine, with specialized models as needed
- Integration with rules-based (stipulated) methods planned

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

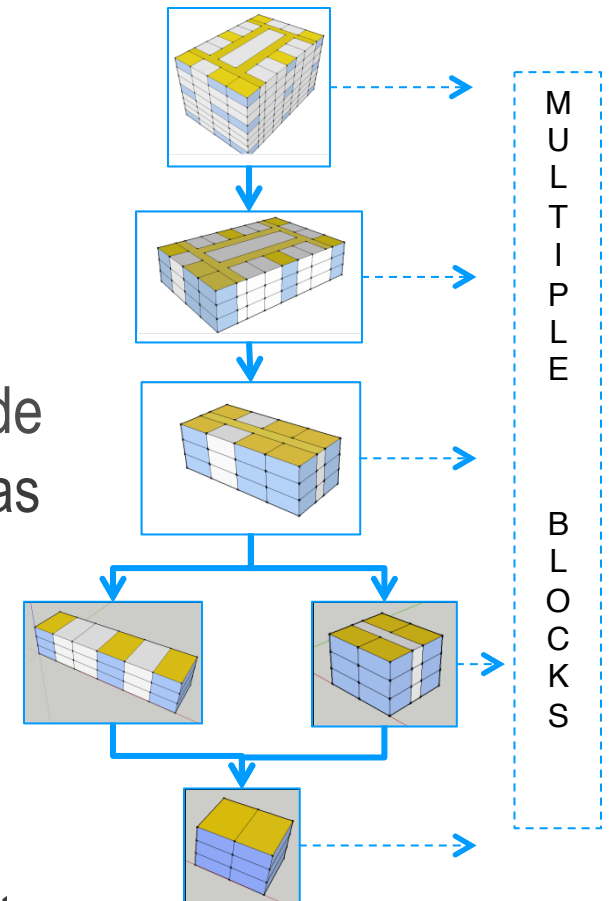

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## New Modeling Approaches

- Multiple Thermal Zones and Building Geometry Adaptation by using:
  - DOE-2 coordinate system
  - Macros and repetitive blocks of DOE-2 code for scaling spaces, surfaces, and systems as needed (needs to scale up for Version 2)
  - Multipliers for similar zones and floors
  - Selective blocks of DOE-2 code for some types of common areas
  - Error checking to verify consistency of input

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

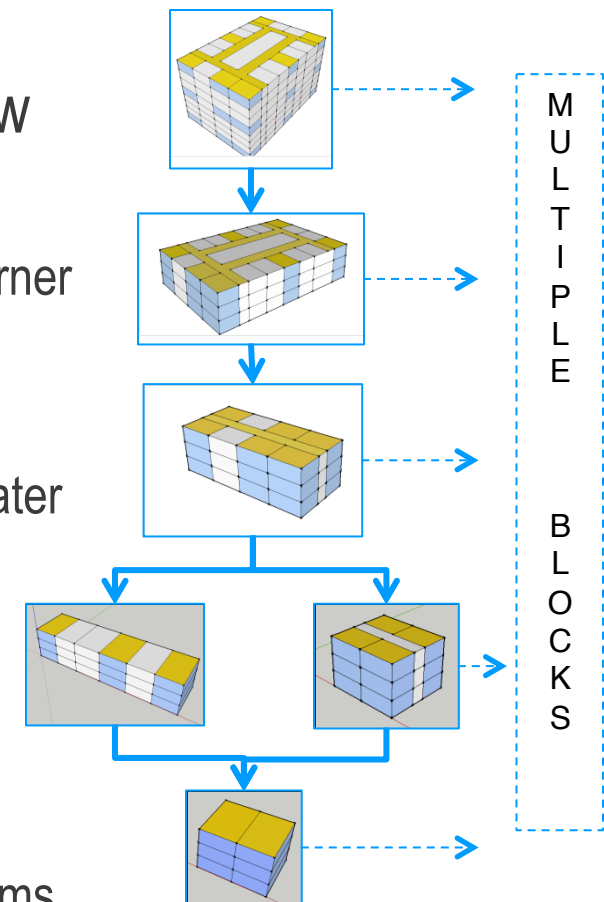

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Weatherization Assistant V1 and V2

- Version 1 - simpler buildings & systems, few extras
  - Low-rise, up to four floors, separate treatment of corner and interior units, first and top floors
  - Individual dwelling unit space conditioning systems
  - Both dwelling unit and central-plant domestic hot water systems
- Version 2 - more complex buildings & systems, additional capabilities
  - High-rise with service core (elevators, etc.)
  - Central plant with built-up space conditioning systems
  - More complex measures, rules-based savings

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Home Energy Saver Integration

- Existing HES methods and supplementary analyses will extend to MF (full set of end uses, carbon emissions, economics, etc.)
- HES Consumer and Pro will support assessment of individual units (tenant perspective) as well as facility-level (owner perspective), outside the formal WAP framework
- HES infrastructure (models, cloud computing, database) will support WAP tool as well
- Third-party software developers can use the HES MF APIs to incorporate the same functionality into their own software tools

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Major Components Developed for the Multifamily Tool

- New web service to provide a user interface for WAP energy auditors, agencies, and others to a web-based Weatherization Assistant
- Major Weatherization Assistant back-end applications to handle energy audit, agency, client, state, and other data and data interactions
- New web service interface for multifamily building energy audits within the Weatherization Assistant
- Major new HES back end applications (layers) to handle multifamily energy calculations and interfaces to different clients

U.S. DEPARTMENT OF  
**ENERGY**

Energy Efficiency &  
Renewable Energy

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Major Components Developed for the Multifamily Tool

- Extensive macro templates of DOE-2.1e code required to handle multiple building and system configurations, including retrofit measures
- Domestic Hot Water models for both single unit and central system types
  - Individual unit systems: Based on the existing Home Energy Saver model
  - Central plant based systems with recirculation loops: A generic non-California specific version built from the multifamily DHW model documented in *Draft Measure Information Template – Water and Space Heating ACM Improvement*, 2013 California Codes And Standards Enhancement Initiative report, May 24, 2011 Public Workshop. (“2013 CASE Space and Water Heating 051911.pdf”, PG&E, SCE, SDGE, Sempra. Download at [www.energy.ca.gov](http://www.energy.ca.gov))
- Major new application interface for the HES web service to handle the new multifamily DOE-2 and other specialized models (e.g., DHW, Appliances)

Energy Savings Measure Economics

## Energy Savings Measure Economics

Include in Package:	Index	Measures	Components (componentCode)	Measure Cost [\$]	Individual SIR	Buy-down Amount [\$]	
						Minimum Required	Available
<input checked="" type="checkbox"/>	1	Infiltration Reduction	Bldg1	1,800	1.15	0	0
<input checked="" type="checkbox"/>	2	Replace Heating System(s)	HtgSys1, HtgSys2	24,000	1.09	0	0
<input checked="" type="checkbox"/>	3	Add Storm Windows	Win1, Win2, Win4	20,000	0.45	14,800	15,000

## Individual Measure Results

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

Basecase Simulation Results

Individual Measures

Packaged Measures

Annual Energy and Cost Savings

## Revised Annual Energy and Cost Savings (for Measures Implemented in the Package)

Index	Measure	Components (componentCode)	Revised Annual Energy Savings [MMBtu]				Revised Annual Energy Cost Savings [\$]			
			Heating	Cooling	Baseloads	Total	Heating	Cooling	Baseloads	Total
1	Infiltration Reduction	Bldg1	8.5	2.5		11.0	83	36		119
2	Replace Heating System(s)	HtgSys1, HtgSys2	174			174	1300			1300
3	Add Storm Windows	Win1, Win2, Win4	42	4.6		49	315	140		455

Energy Savings Measure Economics

## Revised Energy Savings Measure Economics (for Measures Implemented in the Package)

Include  
in Work  
Order:

Index	Measures	Components (componentCode)	Cost		SIR	
			Measure Cost [\$]	Cumulative Cost [\$]	Revised Measure SIR	Cumulative SIR
1	Infiltration Reduction	Bldg1	1,800	1,800	1.15	1.15
2	Replace Heating System(s)	HtgSys1, HtgSys2	24,000	25,800	1.09	1.11
3	Add Storm Windows	Win1, Win2, Win4	5,000	30,800	1.0	1.05

## Measure Package Results

# 2011 National Weatherization Training Conference

December 12-15, 2011  
NEW ORLEANS, LOUISIANA

## Pilot Testing

- User representatives invited to “kick the tires” and provide feedback
- Version 1 Pilot testing signup begins January 2012
- Participate in Pilot testing - send email to:
  - Mark Ternes, [ternesmp@ornl.gov](mailto:ternesmp@ornl.gov)
- Other ways to provide input
  - Participate in Technical Advisory Group - send email to:
    - Norm Bourassa, [NJBourassa@lbl.gov](mailto:NJBourassa@lbl.gov)
  - Join the Multifamily Tools discussion group on the [homeenergypros.lbl.gov](http://homeenergypros.lbl.gov) social network

## Why is this needed?

### Quality Work = Sustainability

- Consistency and guidelines for quality will create a stable market for the Home Performance Industry
  - Consumers and Industry Stakeholders can have confidence that there is a baseline standard for quality in the work and the workforce.
  - This confidence comes in large part from the knowledge that these guidelines are supported by a program with 30 year legacy that can provide consistent leadership in maintaining and updating these resources.
